

TEZGÜLLER MAKİNA

Tezgüller was found in 1974. Tezgüller company has been manufacturing concrete block machines, concrete pipe machines and all their equipments (Moulds, concrete mixers, conveyor belts, concrete distribution hoppers). The company produced wide variety of engineering products refer to concrete construction section of the industry. Now the manufacturing has been doing in our modern factory (10000m2 closed production area). In such a short time broadened its manufacturing types and nowadays we have a wide customer net to Europe from Asia and Middle East to Africa. Our machines and moulds are being used in 28 different countries. All concrete block moulds have been prepared fully automatically CNC machines. We can serve our customers with full of competitive and economic ways. It will be very useful to your company to consult us when you need a concrete product equipment or new concrete plant. An experienced design team is ready to negotiate with your company in your projects.

PM 509 CONCRETE BLOCK MACHINE

PM 509 CONCRETE BLOCK MACHINE

> TECHNICAL SPECIFICATIONS

TECHNICAL PROPERTIES :

Vibration Motor : Weighted from outside
Lubrication : Gress oil
Vibration Motor : 2800rpm - 2Pcs x 4kw
Total Energy Power : 20Kw

HYDRAULIC PROPERTIES:

Pump : 50lt/min.
Working Pressure : 120Bar
Hydraulic Tank : 250lt
Hydraulic Motor : 1400rpm - 11kw

PRODUCTION PROPERTIES:

Mode of Control : Manuel
Production/Cycle : 20-35 seconds
Pallet Capacity : 15 pieces
Pallet Size : 92cm x92cm
Mould Weight : 700.-Kg
Bunker Volume : 1m³

MACHINE DIMENSIONS:

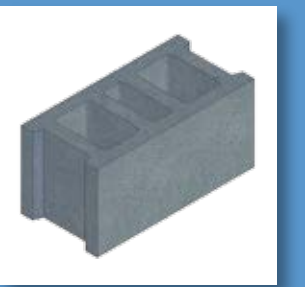

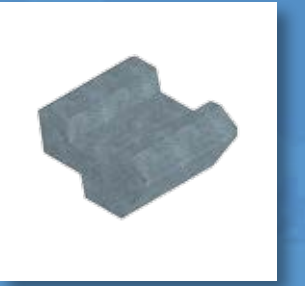

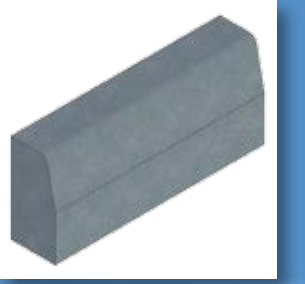

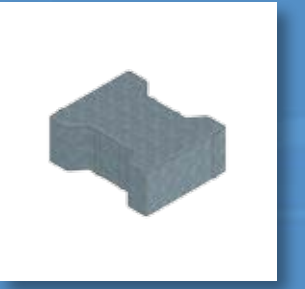

Width : 2.0m
Height : 2.8m
Lenght : 7.2m
Machine Weight : 8ton

MACHINE WORKING AREA:

Width : 12m
Height : 6m
Lenght : 20m

PM 509 CONCRETE BLOCK MACHINE:

- PM 509 has a double buncer
- PM 509 can produce double layer stone
- PM 509 can produce concrete products from 50mm thickness to 250mm.
- PM 509 can produce 0.5m² concrete block at one press
- PM 509 has a property of rapid mould change system
- PM 509 is a manual machine and easy to control
- PM 509 has a property of rapid installation and dismantle
